CHMB Deploys EHR on Apple iPad

Allscripts Enterprise EHR fully functional

CHMB is proud to announce we have full capability with our subscription-based Allscripts Enterprise EHR onto the Apple iPad.

CHMB's unique and innovative delivery platform has allowed us to bring you the full clinical desktop - including note authoring, lab ordering, and ePrescribe - components right into the Apple iPad in its rapid fashion.

"We are thrilled to have the latest technology platform in the Apple iPad meet the requirements necessary to fully utilize all the functionality of Allscripts EHR platform," stated Darius Shayegan, Director of Physician Advocacy. "Our clients have been asking if the iPad will work in their clinical environment and we are excited to be able to offer both solutions."
